

VERSO

digital signage

OCEANSTREAM

Based on our innovative cloud infrastructure OCEANSTREAM delivers digital signage systems for permanent and temporary installations.

Virtually managed, our signage is perfect for trade floors and conference applications. Our integrated web control and real-time remote management make VERSO ideal for wayfinding and information screens in lobbies, meeting spaces and event venues.

Live updates are ideal for sports and e-sport events and venues. Our creative team work in tight integration with museum and gallery teams to create immersive interactive screen solutions.

Dynamic retail and food and beverage signage keep items current and exciting, with real-time updates to highlight specials and coming events.

Our custom designed signage hardware leverages the latest technologies. From planning to packaging to installation, our teams have you covered from inception to "live".

Our expert teams can also package solutions for touring installations and live events, all using our tightly integrated cloud control systems.

Our cloud backbone and self-aware signage technologies ensure maximum uptime. Our constant monitoring service allows our staff to identify and remedy issues long before they affect your presentations.
