

VERSO

plug and play
digital signage

Based on our innovative cloud infrastructure OCEANSTREAM delivers digital signage systems for permanent and temporary installations through our VERSO™ suite of products.

Virtually managed, VERSO™ works seamlessly with all display mediums. Perfect for audience facing displays, within all immersive environments.

Our integrated web control and real-time remote management make VERSO™ ideal for all wayfinding and event venues.

Live updates are critical within all immersive environments. Working with our creative team can support all your visual communication needs.

Our custom designed signage hardware leverages the latest technologies. From planning to packaging to installation, our teams have you covered from inception to "live".

Our expert teams can also package solutions for touring installations and live events, all using our tightly integrated cloud control systems and AI integrations.

Our cloud backbone and self-aware signage technologies ensure maximum up-time. Our constant monitoring service allows our staff to identify and remedy issues long before they affect your presentations or productions.

immersive environments
corporate events / show floors
permanent signage – food and beverage / POS
way finding – embedded promotions
info/news/weather – lobbies/elevators
museums and galleries
sporting events and venues
e-sports events and venues
